ABOUT ME

I am an experienced front-end developer specializing in improving user interface usability and optimizing the performance of web applications. My key skills include maintaining and enhancing codebases, efficient debugging, and integrating new features that extend product capabilities and functionality. I am focused on leveraging modern technologies and adhering to best development practices to create intuitive and high-performance applications.

MY SKILLS

React	Next.js	i18n
TanStack Query	TypeScript	
SCSS/Styled components	Redux/Zustand	
React router/TanStack router	Antd/MUI	
Webpack/Vite	Fetch/Axios	
CI/CD	Charts/ECharts

EXPERIENCE

DEX TECHNOLOGIES
Company website: https://dex-it.ru

Tiraspol
Aug 2024 - Present

«Nekmarket»

Period: October 2024 - present

Nekmarket - Official technology partner of Yandex.Market, providing comprehensive services and professional support to sellers for successful entry into marketplaces such as Yandex.Market, Ozon, and Wildberries. The goal of the project is to help sellers increase their personal income through convenient management tools tailored to their needs.

Responsibilities:
-Experience launching projects from scratch, including technology stack selection.
- Development of interfaces for various user roles, including purchasing managers, commodity experts and personal accounts
- Implementation of tables with editable data
- Creating an interface for cash management movement
- Choosing the Optimal Development Tools
- Ensuring adaptability of the user interface
- Decomposition of tasks, their assessment and implementation
- Bug fixing and code refactoring
- Integration with backend services

Technologies: React, TypeScript, MUI, Tanstack Query, Tanstack Router, Zustand, Swagger

Team: Frontend - 2, Backend - 2, PM, UX/UI, system design, DevOps

«S.Y.N.A.P.S»

Period: November 2024 - present

S.Y.N.A.P.S — Intelligent Environmental Monitoring and Analysis System is an innovative solution for comprehensive monitoring of environmental parameters, adaptable to your specific needs. The system is capable of detecting changes in any physical quantities by connecting new types of sensors.

Responsibilities:
- Experience launching projects from scratch, including technology stack selection.
- Decomposition of tasks, their assessment and implementation
- Communication with the team
- Deep dive into Chart.js: built an interactive chart displaying sensor-registered parameters over a selected time interval
- Developed features for user authorization and registration
- Integration with backend services

Technologies: React, NextJs, TypeScript, Antd 5, Tanstack Query, Tanstack Router, Zustand, Swagger
Team: Frontend - 2, Backend - 2, PM, UX/UI, DevOps

«MaxModal» https://maxmodal.com/

Period: February 2025 - present

Maxmodal - MaxModal is a logistics and maritime transportation company, typically involved in container shipping and multimodal transport (sea, rail, road). The name suggests a focus on maximizing modal efficiency — using multiple modes of transport to optimize delivery routes and costs.

Responsibilities:
- Implementation of chat on Matrix synapse for internal system communication
- Development of new functionality and its integration into the existing system
- Ensuring adaptability of the user interface
- Redesign of individual parts of the application
- Decomposition of tasks, their assessment and implementation
- Bug fixing and code refactoring
- Language locale extension (Chinese, Russian, English)
- Integration with backend services

Technologies: React, TypeScript, MUI, Tanstack Query, Tanstack Router, Zustand, Swagger
Team: Frontend - 2, Backend - 2, PM, UX/UI, DevOps

«Spartak» https://spartak.com/

Period: December 2025 - present

Spartak - A multifunctional platform for the Spartak Moscow Football Club that connects fans with the team. The site features up-to-date club news, an online merchandise store, a football academy section, ticket purchasing, player voting, and special offers.

Responsibilities:
- fixing bugs in functionality and layout

Technologies: React.js, Next.js, Redux toolkit, React hook form, Styled components, i18n
Team: Frontend - 2, Backend - 1, PM, UX/UI, DevOps

Agency AERO

Company website: **https://aeroidea.ru/**

Moscow
Oct 2022 - June 2024

Project of the «Prosveshchenie» Group of Companies.

Period: July 2022 - August 2023

"Prosveshcheniye" Group of Companies — A leading Russian holding company operating in the fields of education, leisure, and development, providing products and services in printed and digital content, professional development and retraining, additional education for children and adults, material and technical support for educational institutions, and digital services across the Russian Federation and international markets.

Responsibilities:
- Development of the audio section for educational materials from scratch, including a listing page, a detailed page, and a tracks page, with the ability to play each track using a fully functional audio player (track seeking, multiple repeat modes, playback speed adjustment).
- Adaptation of the version for visually impaired users
- Development of new functionality
- Developing a responsive user interface
- Implementation of a photo gallery with reviews (slides, comments)
- Code review

Technologies: NextJS, TypeScript, Tanstack query, Zustand, Storybook, React, Swagger, Jest, React testing library
Team: Frontend - 5, Backend - 5, PM, UX/UI-2, DevOps

«ShopStarter»

Period: Sept 2023 — Sept 2024

ShopStarter- a ready-to-use online store foundation with core features: product catalog, customer journey from cart to checkout, product detail page with photo gallery, user account dashboard, and more.

Responsibilities:
- Implemented the product purchase flow from adding to cart to order placement
- Estimating the time required to complete tasks
- Development of a photo and video slider for the product page
- Cross-review
- Development of a user's personal account
- Timely completion of reports on task completion

Technologies: NextJS, TypeScript, Tanstack query, Zustand, Storybook, React, Swagger, Jest, React testing library

Team: Frontend - 2, Backend - 1, PM, UX/UI-1
